TDMS – Test Data Management System
User Manual

1 Introduction

1.1 Overview

The Test Data Management System (TDMS) is a comprehensive application designed to manage test cases, test plans, targets, prompts, and responses for AI model evaluation. This document provides a detailed user guide for navigating and utilizing the TDMS application effectively.

1.2 System Requirements

- Modern web browser (Chrome, Firefox, Safari, or Edge)
- Internet connection
- Valid user credentials (provided by administrator)

2 Getting Started

2.1 Logging In

1. Open the TDMS application in your web browser
2. Enter your username and password
3. Click **Login** or press Enter
4. Upon successful login, you will be redirected to the Dashboard

Figure 1: Dashboard after successful login

3 Managing Test Cases

3.1 Viewing Test Cases

1. From the sidebar, click on "Test Cases"

2. The system will display a list all availabel test cases

3. Use the search bar to filter to filter test cases by name

4. Use the history icon to view the history of each test case

5. Use the pagination controls to navigate through multiple pages of results

Figure 2: Test Case Table

3.2 Creating a New Test Case

1. Click the "Add Test Case" button

2. Fill in the required fields:

   - **Name**: A descriptive name for the test case
   - **User Prompts**: Enter/Search the user prompts
   - **System Prompts**: Enter/Search the system prompts
   - **Domain**: Select the domain
   - **Language**: Select the language
   - **Response**: Enter/Search the expected or actual response
   - **Response Language**: Select a language
   - **Response Type**: Select a type (eg., "GT" for Ground Truth)
   - **Strategy**: Select from available strategies - The LLM Prompt will be displayed based on the selected strategy
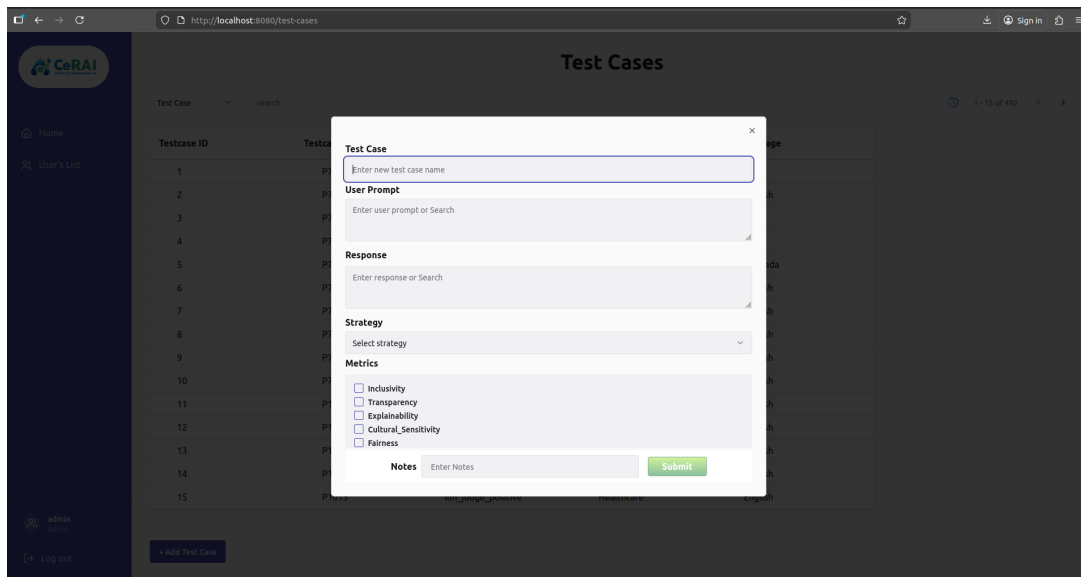

Figure 3: Add Test Case

- **LLM Prompt**: Select the LLM prompt
- **Metrics**: Select one or more metrics

3. Click **Submit** after adding a note to create the test case

3.3 Updating and Deleting Test Cases

Locate the test case you want to Edit / Delete (eg., Test Case Name : P710)

Figure 4: Add Test Case

3.3.1 Updating a Test Case

1. Click the **Edit** button

2. Modify the necessary fields

3. Click **Submit** to update the test case

3.3.2 Deleting a Test Case

1. Click the **Delete** button

2. Confirm the deletion in the Confirmation dialog

Note: Only users with appropriate permissions (Admin, Manager) can delete test cases.

4 Other Modules

4.1 Test Plans

Test plans group test cases and metrics together for organized evaluation.

4.1.1 Creating a Test Plan

1. Navigate to **Test Plans**

2. Click **Add Test Plan**

3. Fill in the following details:

   - **Test Plan Name**: A descriptive name
   - **Description** (optional): Additional details
   - **Test Cases**: Select test cases to include
   - **Metrics**: Select metrics to evaluate

4. Click **Submit**

4.1.2 Managing Test Plans

- View all test plans on the **Test Plans** page

- Edit test plans to add or remove test cases and metrics

- Delete test plans (Admin and Manager users only)

4.2 Prompts

Prompts are reusable input texts that can be associated with test cases.

4.2.1 Creating a Prompt

1. Navigate to **Prompts**

2. Click **Add Prompt**

3. Fill in the following fields:

   - **User Prompt**: The user-facing prompt text
   - **System Prompt**: System-level instructions
   - **Domain**: Select or create a domain
   - **Language**: Select or create a language

4. Click **Submit**

4.2.2 Managing Prompts

- View all prompts on the **Prompts** page

- Edit prompts to change user prompt and system prompt

- Delete prompt (Admin and Manager users only)

4.3 Responses

Responses expected outputs from AI systems.

4.3.1 Managing Response

- View all responses on the Responses page

- Edit responses to change or update response text and prompts

- Delete responses (Admin and Manager users only)

4.4 Strategies

Strategies define how test cases should be evaluated.

4.4.1 Creating a Strategy

1. Navigate to **Strategies**

2. Click **Add Strategy**

3. Fill in the following fields:

   - **Strategy Name**: A unique name
   - **Description** (optional): Details about the strategy

4. Click **Submit**

4.4.2 Managing Strategy

- View all strategies on the Strategy page
- Edit strategies name and description
- Delete strategies (Admin and Manager users only)

4.5 Targets

Targets represent the systems or applications being tested.

4.5.1 Creating a Target

1. Navigate to **Targets**
2. Click **Add Target**
3. Fill in the following details:
   - **Target Name**: Name of the target system
   - **Target Type**: Type of target (e.g., "WhatsApp", "WebApp")
   - **Description** (optional): Additional details
   - **Domain**: Select the domain
   - **Languages**: Select one or more languages
4. Click **Submit**

4.5.2 Managing Target

- View all Targets on the Target page
- Edit targets type and languages
- Delete targets (Admin and Manager users only)

4.6 Domains

Domains categorize test data by subject area such as Healthcare, Finance, or Education.

4.6.1 Creating a Domain

1. Navigate to **Domains**
2. Click **Add Domain**
3. Enter the domain name
4. Click **Submit**

4.6.2 Managing Domain

- View all Domains on the Domain page

- Edit Domain

- Delete Domain (Admin and Manager users only)

4.7 Languages

4.7.1 Creating a Language

1. Navigate to **Languages**

2. Click **Add Language**

3. Enter the language name (e.g., "English", "Hindi", "Tamil")

4. Click **Submit**

4.7.2 Managing Language

- View all Languages on the Language page

- Edit Language

- Delete Language (Admin and Manager users only)

4.8 Managing Metrics

Metrics define which aspects of responses are evaluated.

4.8.1 Creating a Metric

1. Navigate to **Metrics**

2. Click **Add Metric**

3. Fill in the following details:
    - **Metric Name**: Name of the metric (e.g., "Toxicity", "Similarity", "Grammar")
    - **Description** (optional): Details about the metric
    - **Domain**: Select the domain

4. Click **Submit**

4.8.2 Managing Metric

- View all Metrics on the Metric page

- Edit Metric

- Delete Metric (Admin and Manager users only)

4.9 LLM Prompts

LLM Prompts are used for LLM-as-a-judge evaluation methods.
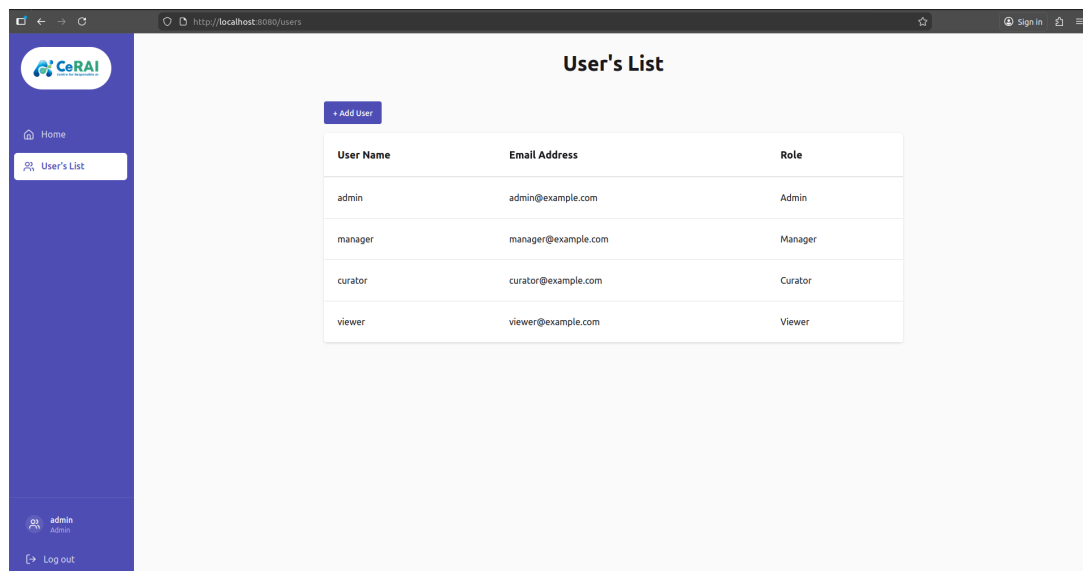

4.9.1 Creating an LLM Prompt

1. Navigate to **LLM Prompts**

2. Click **Add LLM Prompt**

3. Fill in the following fields:
   - **Prompt**: The evaluation prompt text
   - **Language**: Language of the prompt

4. Click **Submit**

4.9.2 Managing LLM Prompts

- View all LLM judge prompts on the LLM prompts page

- Edit LLM prompt to change or update prompt text and domain

- Delete LLM prompt (Admin and Manager users only)

5 User Management (Admin Only)

Administrators can manage user accounts.

Figure 5: List of User's

5.1 Creating a User

1. Navigate to **Users**

2. Click **Add User**

3. Fill in the following details:

   - **Username**: Unique username
   - **Email**: Unique email
   - **Password**: Secure password
   - **Role**: Admin, Manager, Curator, or Viewer

4. Click **Create**

Figure 6: Create a new user

5.2 Updating a User

1. Navigate to **Users**

2. Locate the user and click **Edit**

3. Modify the username, password, or role

4. Click **Update**

5.3 Deleting a User

1. Navigate to **Users**

2. Locate the user and click **Delete**
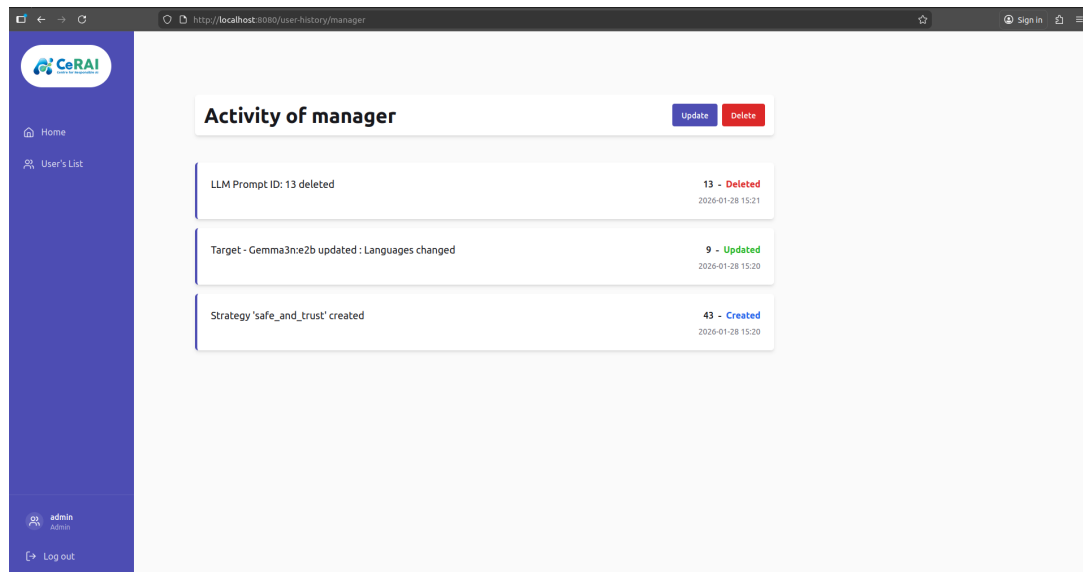

3. Confirm the deletion

Figure 7: Update or Delete user

6 Role-Based Permissions

Different user roles have different permissions within TDMS.

6.1 Admin

- Full access to all features
- User management (create, update, delete users)
- All CRUD operations on all entities
- View activity history

6.2 Manager

- Create, update, and delete tables or entities
- Cannot manage users
- View activity history

6.3 Curator

- Create and update records
- Cannot delete records
- Cannot manage users
- View activity history (limited)

6.4   Viewer

- View all data (read-only)

- Export data (if available)

- Cannot create, update, or delete records

- Cannot manage users
